# WELCOME TO THE TALL SHIPS RACES 2022 IN ESBJERG

Dear Captain

Thank you for taking part in the Tall Ships Races 2022; it is on this festive occasion I bid you and your crew a warm welcome to Esbjerg. It is good to see familiar and new faces on the quays of Esbjerg.

We have looked forward to welcoming the Tall Ships Races fleet once again, as previous visits always have been great successes. For the first time, Esbjerg will be a starting port, and we aim to set the bar high for the rest of the race.

When sailing to Esbjerg you may see some of the offshore wind farms a bit north of Esbjerg, and these wind farms have played an immense role in the green transition, which Esbjerg is dedicated to. As a municipality, we aim at being carbon-neutral in 2030, and the power generated by the offshore wind farms will contribute to this goal. Esbjerg is the sustainable EnergyMetropolis of Denmark, and our status is underlined by the addition of several Power-to-X facilities, which are on the way. These facilities will turn green power into green fuels, thereby replacing fossil fuels. Esbjerg stands as a unique example of how a city contributes to many aspects of the green transition.

This development is only possible because of the Port of Esbjerg, and without our port, Esbjerg would not be the city, we know today. While all the tall ships visit Esbjerg, the spectacular sight will remind us of Esbjerg's history as a hub for industrial fishing. However, the young trainees onboard will take us back to the present while showing us the future.

I hope that you will enjoy your time in Esbjerg. Please reach out to your appointed liaison officer if you need anything during your stay.

I will look forward to meeting you in person at the Captain's Dinner.

Kind regards

Jesper Frost Rasmussen  
Mayor

## 2. ARRIVAL ARRANGEMENTS

### 2.1 NAVIGATIONAL

#### 2.1.1 GENERAL

The Port Esbjerg is situated on the west coast of the peninsula Jutland at position 55°28' N and 008°26' E.

The Port and the approaches are described in various publications, i.e. "Guide to Port Entry" and "Den danske Havnelods".

Seacharts: Danish No. 95 Graadyb (INT 1451), No. 60 Nordsoen, Fanøe Sylt and No. 61, Nordsoen, Blaavandshuk to Fanøe.

Esbjerg is a busy port providing berths and cargo handling facilities for the offshore oil and gas industry, off- and onshore wind energy projects, intermodal shipping and general cargo. Esbjerg is called by around 5.500 ships per year.

In addition to these 5.500 calls the ferry between Esbjerg and the island of Fanøe calls some 15.000 times per year. The ferries (Grotte, Menja and Fenja fig. 1) depart from Esbjerg (Sønderhavn) and respectively Fanøe every 20 minutes during daytime. The ferries use VHF channel 12 and the route is shown with red arrows on fig. 2.

Fig 1

The port is open around-the-clock and there are no restrictions on times of arrival or departure.

Esbjerg Port Control operates around-the-clock and is called in accordance with the communication procedures described in this handbook.

In order to coordinate the movements of the Tall Ships Races fleet, all participants can expect close guidance during transit through the fairway.

Fig 2

There are no local weather phenomena which make arrival or departure inadvisable.

Time is always referred to as local time (UTC + 2 hours). Speed in the harbour basins must always be slow. Mean density of the water in the port is 1,020.

#### 2.1.2 ETA-MESSAGE AND PILOTAGE

ETA-message to Esbjerg Port Control must be sent on VHF channel 12 no later than 1 hour before entering the Graadyb fairway.

A request for a pilot must be sent to DanPilot 24 hours in advance. Estimated time of arrival must be reconfirmed to DanPilot by means of written communication with a notice of 6 hours and once again with a notice of 2 hours – the latter being communicated via VHF channel 87 Simplex.

Vessels requesting pilotage service to depart from port shall provide DanPilot with a notice 4 hours prior to the vessel's departure. The information can be provided by e-mail. Estimated time of departure must be reconfirmed to DanPilot by means of written communication with a notice of 1 hour.

Use of a pilot is free of charge once inbound and once outbound for participants in The Tall Ships Races 2022, who have requested a pilot.

Please contact DanPilot via phone +45 63 25 66 66 or e-mail [danpilot@danpilot.dk](mailto:danpilot@danpilot.dk)

### 2.1.3 APPROACHES AND ANCHORAGE

Merchant ships requesting anchorages are normally directed to positions 1-2 nautical miles W-NW of the Graadyb fairway buoy.

Ships approaching Esbjerg must call Esbjerg Port Control on VHF channel 12 when entering Graadyb fairway. Inside the fairway, participants in the Tall Ships Races 2022 must listen and communicate on VHF channel 12.

Danish Maritime Authority Departmental Order 556 from 10th May 2022 (Navigation in certain Danish waters) is in force with the following supplements:

- If two approaching vessels cannot pass each other without danger the inbound vessel must wait.
- If two vessels cannot pass each other without danger the vessel that will depart from pier shall wait with departure until a ship sailing in the channel has passed, regardless of if it is inbound or outbound.

There is no VTS in force in Graadyb fairway, but a Position Report System is established for merchant and fishing vessels. The Position Report System does not apply to participants in The Tall Ships Race 2022.

The Port of Esbjerg monitors electronic sea charts with ships AIS data of the fairway and the harbour.

### 2.1.4 ENTRANCE

When approaching Esbjerg, ships will have to navigate through the 8-9 nautical miles long partly dredged fairway. The fairway is 200 meters wide, well marked with light buoys and leading lights. The depth in the fairway is minimum 9.8 to 10.3 meters until buoy 21 then 9.3 meters.

Depths refer to Mean Low Water Spring (MLWS). Depths in chart 95 (INT 1451) also refer to MLWS.

### 2.1.5 TUGS

Two tugs are available: two of approx. 3.000 BHP.

The tugs must be ordered two hours in advance via Esbjerg Port Control (VHF channel 12).

Tugs are free of charge for participants in The Tall Ships Race 2022, who have requested tugs. This includes one free assistance inbound and one free assistance out of the port.

### 2.1.6 TIDES AND CURRENTS

Usually, the tidal range at the port is between 1.3 and 1.7 meters but strong westerly winds may cause the water level to increase with up to 2 meters and strong easterly winds may lower the water level with about 1 meter.

The tidal current is strongest at mid-tide and sets across the entrances to the harbour basins. At spring tide, the current can rate up to 3 knots.

At the entrance to the fairway the flood current sets from NNW and the ebb current sets from SE.

In the fairway the tidal current normally sets approximately lengthwise.

High water occurs at Graadyb Bar 1 hour and 15 minutes before HW at Esbjerg.
